Dark and gloomy mixed with a refreshing organic shape. Cala provides carefully shaped porcelain tableware with a black base colour. Its design is based on the perfect balance between material, shape and proportion. The lightweight nature stimulates the manageability of the items. The most surprising part of the collection lies within its innovative reactive glaze. This glaze is manually applied on each item and is made out of a mix of matte and shiny elements. Coupled with a mysteriously smoked mirrored backside, the collection ensures a high class luxury appearance.

For the creation of its Facet collection, CHIC focused mainly on the importance of function and aesthetic values. Tactile characteristics fulfil the timeless designed items, giving them an extra dimension. The geometric shaped relief catches the light and creates an interesting play with shadows, causing beautiful effects that will highlight each dish served. The innovating and playful hints determine the atmosphere at the table, without taking over. Just like the Perla, Classico and Verso collections, this highly versatile collection is also made out of the SiloxiHT formula, which allows the product to be thinner, more durable, lighter in weight and more translucent than any other porcelain product. The shiny off-white glaze encourages the finesse of the collection.

Facet by

Defining your personal interior style often starts with your choice of dinnerware. It reflects your lifestyle, your way of dining. The importance of presentation is without doubt the key feature to a successful dinner. The power of tableware lies within its capacity to enhance the dining experience, without taking the spotlight away from the dishes. It definitely enriches the total food experience.

Keeping that in mind, the Belgian brand CHIC brings you unique and timeless designed tableware, in combination with

unique material features. Currently, the tableware industry is strongly focused on design, whilst the user-friendliness of the products is regarded as less important. To counter this, CHIC aims to produce user-friendly products with an added value. The different product lines of the brand CHIC are developed with the vision to combine an elegant design with innovative materials (e.g. lightweight material; magnesium porcelain; mass coloured) that on their turn meet the user requirements. With its innovative tableware products you'll

be able to create a food presentation that satisfies your own wants and needs.

CHIC was founded end 2014 in Belgium and became a real success since the launch of its famous Claro gold range (08/2015). The young brand was already nominated a few times, mainly in the hospitality sector. The designs of CHIC are the result of a close cooperation between a Dutch-Belgian design team supported by an international team of product specialists.

Chic Mix and Perla Gold by

Chic Mix by

CHIC MIX

Keeping the trend of combining different shapes and colours into one setting in mind, the CHIC Mix collection offers the chef the perfect tools to showcase his dishes and food. The range is the perfect addition to any table. Mixing and matching the different items will add colour and character to your dining experience. Moreover, the combinations of different shapes, textures and materials will guarantee a joyous entertainment of food.

Chic Mix includes all kinds of bowls and several plates in vibrant, attractive colours, made from natural stoneware. The bowls and plates are manufactured in European production units, located in Portugal.

This vibrant collection also includes several elegant table accessories.

Take for example the serving boards which are made of bamboo. The bamboo material is lightweight, easy to clean and naturally stain-resistant. The oil and vinegar bottles on the other hand are made of borosilicate glass and owe their finesse to an own design by Chic. The bottle with handy spout does not interfere with any table setting. Thanks to the borosilicate base material, the vinegar bottle is heat and cold resistant, allowing it to be suitable for any type of liquid (e.g. oil or sauce).

The latest additions are the black and white marble dishes, covered jars and coasters, perfect for serving small degustation portions. These beautiful items with natural feeling allow you to create a more tranquil atmosphere.

CLARO

The Claro collection is the ultimate proof of pure European craftsmanship. The collection, made from natural stoneware, contains various items in organic, round shapes. The range stands out because of the shiny metallic gold and silver colours and the industrial look of the graphite items. The colours are obtained by a special process during the finishing phase. This results in a

unique product, allowing you to add a luxurious touch to your table. The combination of the organic shapes and metallic colours creates an outstanding product that offers a stunning contrast with white tableware. The collection is doing exceptionally well at various catering establishments and hotels, especially in businesses that want to create a unique atmosphere and experience.

CLASSICO

Just because monochrome typically consists of black and white contrasts, it doesn't mean you can't put your own spin on this trend. One of the new additions to CHIC's portfolio is the Classico range.

Classico consists of two different colours: white and royal blue. This colour scheme will add subtle personality to your table, without overpowering your dishes. When paired, these two tones create an absolutely stunning contrast with each other, resulting in a modern and crisp setting. It's a classic combination that will make any table fresher, cleaner and more inviting. As the name suggests,

Classico resembles a classic shape that never goes out of style. Its clean and perfectly balanced form is perfect for everyday use, as well as special occasions. The items are available in different sizes allowing you to serve your dishes on the most suitable surface.

All the white Classico items are made of the unique SiloxiHT material. The hardness of the material improves the durability of the products and its lightness helps reduce the carbon footprint of daily operations. The blue variations are the result of a combination of lightweight porcelain with a reactive glaze.

CONCHA

The shell-shaped porcelain tableware items from the Concha collection breath the glamorous atmosphere of art deco. Bulky round and oval shapes in combination with a pearly gloss finish ensure tons of ambiance. Add a decorative

detail to your table by using one single item for individual meals or arrange different Concha plates of diverse sizes and shapes into a shiny, captivating cluster of seashells, an interesting canvas for sharing food.

JADE

The perfect balance between design and choice of materials gives the Jade collection a distinct character. The robust but very clean shapes are made of highly durable porcelain, which ensures the strength and durability of the items. Classic forms are combined with a modern touch; appealing, radiant sage green colours are stylishly alternated with subtle

complementary soft white colour tones. The earthy notes create a rural atmosphere that perfectly frames your dishes for a well-thought out meal. Its colours are inspired by the precious gem Jade ("Jadeite"), therefore also the name "Jade". As such, Jade will bring a natural element to any modern or contemporary table.

LIVELLI

Bring some fresh, structured accents of outdoors into your dinner setting with Livelli. Livelli represents playful lines, textured surfaces and organic jagged edges. It's a discrete way to add a touch of colour, pattern and texture to your dinner. Since textured tableware is best in block colours, Livelli consists of 3 striking colour variations: black, white and beige. These base colours really let the raised designs shine to add

instant rustic charm to the table.

Another striking benefit of the Livelli collection is the fact that the items are mass coloured, which means there won't appear any visible discolouration in case of 'chipping'. The plates and bowls are finished with a matte or glossy glaze. Combine the different colours and shapes to set up an utterly stylish dining table.

ORO

Oro resembles a handmade collection of elegant cutlery and accessories made of brass. CHIC found its inspiration in the royal culture of the 19th century. The Oro collection stands out because of its surprisingly classic but timeless design, an own design by the brand CHIC.

All items are handmade, which contributes to its unique character. The soft champagne gold finishing colour adds personality to your table, while providing it with the finishing touch you've always been looking for. All cutlery items are designed with great attention to

the functional aspect. They are well shaped and fit just right in your hand, making them comfortable to use. All cutlery items are available in sets of 4pcs, which allows its users to compile their very own cutlery set.

The Oro collection is made from pure brass with a small percentage of zinc. Because of the food safety of the items, lead was not included in their composition. The items were polished to obtain the beautiful matte gold color. This process is possible thanks to the presence of zinc. Furthermore, no coating was used for the finish.

PERLA

Perla (referencing the beautiful white round pearls from pearl oysters) is a symbol of innovation in several ways. It's the "top of the bill" collection from CHIC, where elemental natural beauty got combined with updated styling. The Perla (white) collection is made of the unique formulation SiloxiHT. This formulation consists of a blend of quality materials, which allows the product to be thinner, more durable, lighter in weight and more translucent than any porcelain product. SiloxiHT guarantees fine bone china looks with robust characteristics. Above this, the durable and lightweight

material is a good feature for the catering and restaurant staff, but also perfectly suited for the airline industry. Both the chef and the person who serves the plates like to work with it.

Perla boosts a magnificent gloss and organic round shapes, which are unique. *"The lightweight nature and durability really appeals to hospitality. The organic shapes look like they add a point of interest but keep quite clean lines, which is ideal. This range is very marketable and the price points make it great value for money"* (Birch, 2018).

Perla award nominated product

Thanks to its unique characteristics, the Perla collection got in its year of introduction nominated for the Horecava Innovation Awards 2018 (Amsterdam), the award for the best innovation in the Dutch foodservice industry. Next to this, the collection was exposed at the “Innovation & TrendLAB” at Horecava and the “What’s new” exhibition’s area at Maison&Objet in Paris. Last but not least, the collection ended up second in the Tableware International Awards of Excellence 2018 in the category “Hospitality”, which was awarded at Ambiente (Frankfurt). Horecava being the largest hospitality fair in the Netherlands, Maison&Objet the international authority for home decor, interior design, architecture and lifestyle culture and Ambiente the world’s most important consumer goods trade fair; therefore these nominations are an achievement on their own.

PERLA GOLD

With its continuous desire to innovate, CHIC aims to light a creative spark within all parties (both business and social) with its Perla range.

The Perla collection got a new, promising subrange, namely Perla Gold. The stunning gold colour ensures a high quality dining experience. The material used differs from the special SiloxiHT material which was used for producing the white Perla items. This because the surprising gold colour variations with metallic characteristics could only be combined with porcelain. As such,

Perla Gold is manufactured out of highly durable porcelain, to ensure the strength and durability for which the Perla collection is known. If you're looking to add an extra glam to your dining experience, this range can make your table setting look simple yet sophisticated. The subtle metallic detailing adds an eye-catching element to your tableware, and it creates a great canvas for your dishes to take full focus at any special gathering.

Pairing the white items with the golden ones ensures a promising table setting, maximizing the potential of each dish served.

VERSO

Set the scene with Verso, one of the most popular Chic ranges so far. Its elegant modern round shape is based on the idea that form should follow function, an embrace of minimalism. The raised edges guarantee anti-spill practices and make stackability of the different items possible.

As well as the Perla collection, the high-quality products of the “Verso” range are made of the unique formulation “SiloxiHT”. This formulation consists of a blend of quality materials,

which allows the product to be up to five times stronger than regular porcelain, extremely thin, extremely light in weight and translucent. The raised edges of the Verso range complete the modern look of the different items.

Verso also includes a bamboo item that can be used either as a plate or as a lid for the matching bowls, as well as a few beige coloured items which give the chef the opportunity to add even more contrast to his or her table when combined with the minimalistic white items.

VERSO BLACK

Verso Black is the new asset of the Verso range, it further enriches the diversity of the collection. Verso Black offers a complete set of porcelain tableware for a sophisticated dinner setting that will let your exquisite menu take centre stage.

The strong dark tones arising from the different items enrich

your table setting by bringing out the best in your creations! The characteristic and sleek metallic finish ensures a vibrant touch to boost the looks of any dish. If you are a chef, you'll be fascinated by the multiple possibilities Verso Black offers and you'll be willing to experiment with its glamorous appearance. Dare to be different.
