Glass in its purest form Arcoroc has the «**High Transparency - Purity certified glass**» label on some of its products, this certifies that these items are made with only **the highest quality glass**.

Due to its composition and laboratory-tested and confirmed performance, Arcoroc glassware features an exceptional level of purity\*\*.

\*\*Quality certified by the IWA 8/AFNOR CLEAR GLASS STANDARD

\*\*

For professionals, breakage problems are a regular occurrence.

**In order to increase the lifetime of product by 10 to 50 times, in 1958, our research and development center developed and perfected since then, a technical process known as «tempering».**

This process provides products with excellent resistance to heat and mechanical shock.

Our items are fully tempered.

#### **Savings in terms of budget and restocking costs:**

a tempered glass can be up to 5 times more resistant than an item that has not undergone any specific treatment process.

#### **Tempered products resist to temperature variations till 130°C:**

they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

\*except for So Urban - thermal shock resistance 110°.

#### **Completely safe for table service\*:**

when a shock or series of shocks manage to rupture the exterior shell of the tempered glass, the resulting glass shards are not sharp to the touch\*.

\*According to the thickness. Cannot be applied to tempered Opal.

# OPAL GLASS

In 1958, the Arc research and development department developed and perfected since then a new material generation for dinnerware: Opal.

Food service professionals all over the world have opted for that all-round **professional material** solution that is **economical, ecological and practical**.

Up to **3 times more shock-resistant** than porcelain: the secret of its unbeatable durability.

Opal Glass products are **resistant to variations in temperature of 130°C**: they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.

**Fade-resistant surface and pattern**, even after 2,000 industrial dishwashing cycles.

As **efficient in keeping food hot** as other materials such as porcelain. (at the same thickness and weight)

Can be **safely handled after microwave** use.

100% Opal, **0% porosity. 100% protection against bacteria.**

Thanks to an innovative manufacturing process. Arcoroc™ oven glass **combines the aesthetics** of opaque ceramics with **the resistance of tempered glass** while staying **light weight**.

To meet professional requirements and intense daily use, Arcoroc™ oven glass products are **highly resistant to mechanical impact** and **temperature variations**.

Up to **3 times more resistant** than porcelain for a long durability.

Oven glass products are **resistant to variations in temperature of 180 °C.**

**250 °C.**

**Fade-resistant surface** even after 2000 industrial dishwashing cycles.

Oven glass products can be **safely handled after microwave** use.

**Non porous** material. **No migration risk** particles into the food.

**Hygienic and healthy.**

**30 % lighter** than porcelain. **Ergonomy** and **practical**.

The ceramic material used for Chef&Sommelier™ and Arcoroc™ collection is of **remarkable quality** (it contains a high percentage of alumina) , which has no equal but its **resistance**.

- **Superior shock-resistance:**

Arcoroc™ and Chef&Sommelier™ porcelain offers a **superior shock resistance** that is perfectly adapted to **professional intensive usages**.

- **Long-lasting scratch resistance.**

- **Excellent dishwasher resistance:**

Both surface and decoration even after 2,000 industrial washes.

- **Cream white porcelain:**

A seal of quality and purity.

as effective as those offered by other materials currently available on the market.

Arcoroc™ and Chef&Sommelier™ cutlery is **designed for intensive and professional use.**

The **reliability and durability** is **underpinned by strict specifications and rigorous checks at each stage of the manufacturing process.**

Most of our collections are done in 18/10 - AISI 304 stainless steel, what is ideal for use in **high-quality cutlery and to guarantee resistance**, the thickness of the cutlery is examined in minute detail.

Some of our Arcoroc™ collections are done in 18/0 - AISI 430 performance polished stainless steel, also **resistant and designed for a long life.**

Each piece of our cutlery has been designed to combine **elegance with perfect ergonomics and balance.**

Our cutlery is **wash resistant and respects dinnerware material** by avoiding **scratches.**

The **bending strength and torsion resistance** has been designed to be above the requirements of the industry.

Regarding our knives some are available in both solid handle and hollow handle formats.

Our solid handle knives have been created to balance weight with design and use the finest quality stainless steel.

Our hollow handled knives use the traditional 3 piece composition, highest grade 18/10 - AISI 304 stainless steel handle (2 piece) and high grade (AISI 420) hardened knife blade (3rd piece), to give the optimum in quality, longevity and design. All of our cutlery collections are dishwasher safe.

Catering professionals are increasingly offering a pricing range that varies according to the weight of the food that their customers take.

To ensure that it is as fair as possible, they need products the weight of which does not vary or varies only slightly from one item to another.

This is where Arcoroc™ comes in, **by controlling the weight of its items**, whether the products are made from Zenix™, Opal or glass.

Within our Arcoroc™ offer, for certain references that are strategic for the venue, **we guarantee a tolerated weight standard** according to the following rule:

- +/- 10 g for items weighing ≤ 500 g

- +/-15 g for items weighing > 500 g
